The Ultimate in Convenience & Efficiency.

heatilator
The first name in fireplaces

Direct-vent gas fireplaces are the most popular solution in new homes today. These sealed combustion units do not use air from your home to operate. Instead, the fire is always behind a piece of safety glass and vented through an exterior wall of your home.

These energy efficient units are virtually maintenance free, and will give you many years of comfort and reliability. We offer a variety of manufacturers to choose from, including Heatilator. Heatilator is one of the most recognized names in the industry, due to their long-standing reputation for remarkable quality and dependability. Heatilator fireplaces give you the selections and features to satisfy your every want and need.

Vented Gas Logs

\$350 – \$1800

Warmth & Comfort for Less.

Vented gas logs are the most cost-effective way to enjoy the convenience of gas in your existing masonry fireplace. Vented gas logs use the air in your home for combustion, so can open the fireplace doors and enjoy them like a true wood-burning fire. We carry the #1 name in the vented gas log market – Golden Blount – recipients of the industry's top fireplace honor, The Vesta Award, for the past 5 years in a row.

Mantels & Surrounds

\$350 – \$1800

Class & Sophistication for Any Decor.

A well-designed fireplace can create a totally new atmosphere for your home – even when it's not being used! We offer gorgeous marble choices, stunning granite surrounds, and genuine hardwood mantels that can transform a room into the most eye-catching location in the house.
