

## Why Diamon-Fusion?

Homeowners, designers, architects, and developers around the world are requesting Diamon-Fusion protective coating on their glass and silica-based surfaces. Its stain-resistant, easy-to-clean features have enhanced all types of glass; from prestigious buildings such as the Old Tiffany Building in New York and the California Academy of Sciences in San Francisco, to the windows and shower doors in your home.

Diamon-Fusion has been independently tested to outperform other coatings in terms of durability and does not require any aftercare products or reconditioning to maintain the warranty.

## Multiple surfaces - one solution

- Shower doors
- Residential windows
- Glass railings
- Insulated glass
- Interior glass
- Retail glass barriers

## What people are saying

"I just can't say enough good things about Diamon-Fusion. Other than a few touch-ups, we haven't had any exterior window cleaning since the coating was applied to our glass nearly one year ago."

– Ken Sutter, VP of Operations,  
Gathering Place, Tulsa, OK

"I read how Diamon-Fusion keeps glass from spotting and had to give it a shot. Fast forward two years and the glass is just as beautiful as the first day it was installed. There is hardly any maintenance. I would recommend it to anyone."

– Lalakini O., Santa Cruz, CA

## Where to find Diamon-Fusion

Diamon-Fusion is available through a network of Certified Diamon-Fusion Dealers who are professionally-trained and equipped to protect your glass investments.

# Protective Glass Coating for the Home

Diamon-Fusion® keeps glass surfaces beautiful for longer.

## Superior glass protection

Diamon-Fusion is an ultra-thin, UV resistant, protective glass coating that transforms ordinary glass into a high-performing, water-repellent surface. Similar to how a non-stick cooking pan works, surfaces treated with Diamon-Fusion become easier to clean and require less care to maintain.

The invisible barrier created in the Diamon-Fusion process is also extremely smooth, which helps prevent environmental pollutants, hard water, and soap scum from damaging the glass.

**Cuts cleaning time up to 90%**

More free time and less cleaning

**Protects against stains and corrosion**

From dirt and grime to limescale and hard water

**Eliminates the need for chemical cleaners**

Eco-friendly; saves on water usage and costly cleaners

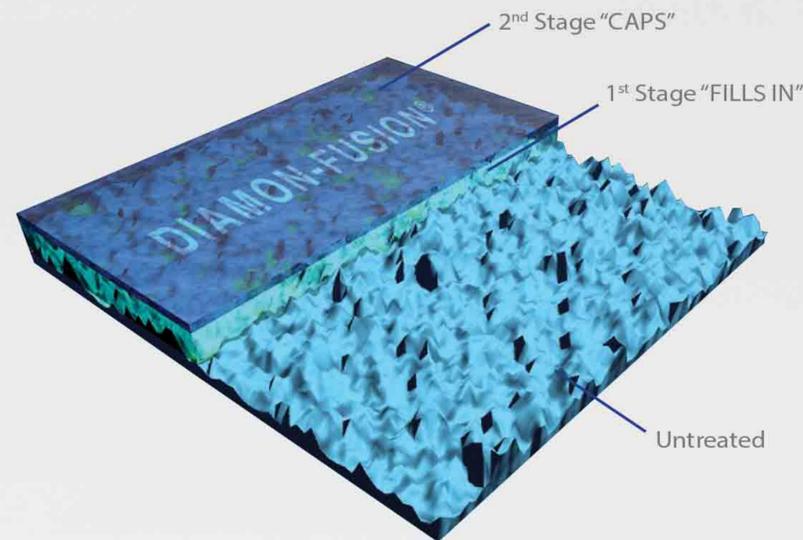

**Creates a more hygienic environment**

Addresses water buildup for less bacterial growth

## How it works

At a microscopic level glass is actually quite rough. Inevitably, this allows minerals from hard water, soap scum, and environmental pollutants to easily penetrate the surface causing unwanted stains. Diamon-Fusion prevents this from happening by creating an ultra-thin, transparent barrier that seals the glass.

Its patented, two-step process (seen above) chemically bonds to the silica in glass filling in the peaks and valleys of the surface.

## Upgrades unprotected glass

- Hydrophobic and oleophobic (water/oil repellent)
- Adds brilliance and 100% optical clarity
- Scratch-resistant (helps prevent abrasion)
- Lifetime warranty on residential surfaces
- 15-year warranty on commercial surfaces\*

\*Optional 15-year warranty extension provided under certain criteria
